

CLEAN SLATE TIP SHEET

Moving homes is a completely overwhelming process, but there is something exciting about making your new house a home. You get a fresh start and the opportunity to create a clean slate. Aside from the chance to decorate and define your new space, you are also learning how to maintain it, even when your busy life now comes with all of those boxes.

Swiffer and Mr. Clean are here to help you along the way! With a few simple tricks, you can keep your new home looking like new long after your housewarming parties have ended.

AROUND THE HOUSE

NO SHOES, NO PROBLEM

Between the movers, the kids, and the dogs, your floor is going to take a beating on move-in day. Don't stress, because Swiffer WetJet traps and locks dirt so it doesn't get pushed around, giving your floors a powerful clean. After the chaos subsides, put a few pairs of shoes in a decorative basket by your front door so everyone remembers to take theirs off before touring your new home.

HOME SWEET HOME

Your new home is full of new nooks and crannies for you to love. Take care of all your surfaces by getting to know what they're made of, and how they should be cleaned. For tile, vinyl, laminate and finished hardwood floors, Swiffer WetJet is the perfect tool. For glass, granite, marble and painted walls, reach for Mr. Clean Magic Eraser. Having all-in-one tools will save you time and storage space.

OUT OF SIGHT, OUT OF MIND

Maintaining a clean home is all about developing good habits. Make a point to clean up any messes as soon as they happen, even if you're pressed for time. Keeping your all-in-one cleaning supplies nearby will make all the difference. Use a self-adhesive hook to hang your Swiffer WetJet in a hallway or bathroom closet so you can quickly break up and dissolve tough messes. And for everyday spills, store a Mr. Clean Magic Eraser under your sink or in a pretty soap dish on the countertop for easy access.

KITCHEN

THE FINISHING TOUCH

Seeing all of those boxes in the moving van might make you think you couldn't possibly fit one more thing in your new home. But you'll be amazed at all of the finishing touches you'll want to add as you start to settle in. Use a Mr. Clean Magic Eraser to wipe stickers and price tags off your new drinking glasses, trays and plates, or the coffee and tea stains off your favorite mug, so it looks new. Your house will be a home in no time!

KITCHEN CATASTROPHES

Finding the perfect spot for everything in your kitchen takes time. Don't be afraid to rearrange cabinets and drawers as you start to get used to your new space. And don't worry about any spills that happen in the process. Swiffer WetJet can handle the sticky messes on the floor. And for those inside your cabinets (think leaky maple syrup!), grab a Magic Eraser Extra Power to easily wipe them away.

BATHROOM

BEST-IN-CLASS GLASS

Your new master bathroom is a serious upgrade. That is, until you realize the shower door doesn't have frosted glass...just left over soap scum from the last owners. Gross! Use Magic Eraser Foaming Bath Scrubber to wipe through tough messes and give yourself a sparkling oasis. After you're done, keep a squeegee in the shower so you can help keep soap scum and mildew at bay in between your regular Magic Eraser wipe downs.

MISSION ACCOMPLISHED

Unpacking is a dirty job, but someone has to do it. After you're finished for the night, use a Swiffer WetJet to quickly lock up any dirt that may have settled on your bathroom floor. Then, take a relaxing bath (after you wipe the tub clean with a Mr. Clean Magic Eraser of course), put on your comfiest PJs, and enjoy your new home!

LIVING ROOM

BURIED TREASURE

You notice a fray in your carpet, and upon closer examination you find the ultimate hidden treasure... hardwood floors! Ditch the shag and refinish the hardwood for a total room makeover. Swiffer WetJet breaks up and dissolves tough messes on your finished wood floors to maintain that clean and shine! For added protection, use felt pads on your furniture legs to avoid any scuffs or scratches as you feng shui.

HANDY HARDWARE HELPER

Dingy doorknobs and rusty fixtures can leave your home looking and feeling outdated. Use a Mr. Clean Magic Eraser Extra Power to revitalize handles, hinges and other hardware throughout your home before you decide to replace them. Magic Eraser's water-activated micro-scrubbers penetrate surface grooves anywhere grime gets trapped to easily remove built-up messes, and it features no harsh chemicals.
